

Minutes of the 60th Meeting of Central Sub-Committee on Crop Standards, Notification and Release of Varieties for Agricultural Crops held under the Chairmanship of Prof. S.K. Datta, Deputy Director General (Crop Sciences), ICAR, on 28th June, 2011 at NBPGR, New Delhi.

The Chairman, Central Sub-Committee on Crop Standards, Notification and Release of Varieties for Agricultural Crops welcomed members of the Sub-Committee, and special invitees. The list of the participants who attended the meeting is annexed as Annexure-I.

Member-Secretary of the Sub-Committee provided the account of the earlier Sub-Committee and its follow-up action and the issues to be discussed by this Sub-Committee. After introduction regular agenda items were taken-up for discussion as under:-

Item No.1: Confirmation of the minutes of 59th meeting of Central Sub-Committee on Crop Standards, Notification and Release of Varieties for Agricultural Crops held on 27th January, 2011 at Vaikunth Mehta National Institute of Cooperative Management, University Road, Pune-411 007.

The minutes of 59th meeting of Central Sub Sub-Committee on Crop Standards, Notification and Release of Varieties for Agricultural Crops has been circulated vide letter No. 3-7/2010-SD.IV dated 1st December, 2010. No comments have been received on the proceedings of the 59th meeting; therefore, the minutes of the meeting were confirmed. The Sub-Committee noted that the Official Gazette Notification for the varieties recommended for notification is being issued.

Item No.2: Review of follow up action of the 59th meeting of Central Sub Sub-Committee on Crop Standards, Notification and Release of Varieties for Agricultural Crops.

The Sub-Committee also approved the notification of the following varieties recommended by the 55th and 58th meeting, which have been kept in abeyance for want of submission of sample with NBPGR, detailed morphological characters, all India coordinated trial data on disease, genesis of parentage etc. for which required information has been received:-

Table-1

S. No	Kind	Variety
1.	Rice	Indam 200-017 (IET 20419)
2.	Wheat	KRL-213
3.	Black gram	COBG 653
4.	Niger	UTKAL NIGER-150 (ONS-150)
5.	Sugarcane	CoOr 03151

Item No.3: Release and notification Proposals received for consideration in the 60th Meeting of Central Sub-Committee on Crop Standards, Notification and Release of Varieties for Agricultural Crops.

The following proposals have been received for consideration in the 60th meeting of the Sub-Committee for release/notification (Central varieties) and the particulars of the same are given as under:-

Table – 2

Following varieties recommended for release/notification (Central varieties).

S. No.	Crop	Name of the variety	Recommended area
1.	Rice	SJR-5 (IET-19972)	1. Recommended for release and cultivation in the States of Jammu, Haryana and Tamilnadu under transplanted condition. Average yield under normal condition is 5.5 to 6.0 ton/ha. 2. Recommended for notification to entire country.
2.	Wheat	MP 3288 (JW 3288)	1. Recommended for release and cultivation in the States of Madhya Pradesh, Chhattisgarh, Gujarat, Kota and Udaipur divisions of Rajasthan and Jhansi division of Uttar Pradesh under rainfed and restricted irrigated timely sown conditions. Average yield under normal condition is 35 q/ha. Resistant to black rust. 2. Recommended for notification to entire country.
3.	Maize	DKC 9081 (MON 29)	1. Recommended for release and cultivation in the States of Uttar Pradesh, Bihar, Orissa, Jharkhand and Assam in Rabi season. Average yield under normal condition is 9098 kg/ha. 2. Recommended for notification to entire country.
4.	Maize	IG 8011 (MCH 37)	1. Recommended for release and cultivation in the States of Andhra Pradesh, Karnataka, Maharashtra and Coimbatore district of Tamil Nadu in Kharif season. Average yield under normal condition is 8125 kg/ha. 2. Recommended for notification to entire country.
5.	Maize	IG 8237	1. Recommended for release and cultivation in the

		(MCH 38)	States of Bihar, Orissa, West Bengal, Jharkhand, Andhra Pradesh, Karnataka, Maharashtra and Tamil Nadu in Kharif season. Average yield under normal condition is 8584 kg/ha. 2. Recommended for notification to entire country.
6.	Sorghum	SPSSV 6 (CSV 24 SS)	1. Recommended for release and cultivation in all the sorghum growing areas of the country in Kharif season under assured irrigated condition. Average yield under normal condition is 14 ton/ha resistant to shoot fly and stem borer. 2. Recommended for notification to entire country.
7.	Pearl Millet	PAC 909 (MH-1435)	1. Recommended for release and cultivation in the States of Maharashtra, Andhra Pradesh, Karnataka and Tamil Nadu under rainfed condition. Average yield under normal condition is 3491 kg/ha. Resistant to Downy mildew, Ergot, smut and Rust. 2. Recommended for notification to entire country.
8.	Pearl Millet	86M66 (MH1617)	1. Recommended for release and cultivation in the States of Rajasthan, Gujarat, Haryana, UP, MP, Punjab and Delhi in kharif season. Average yield under normal condition is 3304 kg/ha. 2. Recommended for notification to entire country.
9.	Pearl Millet	Mandor Bajra Composite 2 (MBC 2)	1. Recommended for release and cultivation in the States of Rajasthan, Gujarat and Haryana in dry areas under rainfed condition. Average yield under normal condition is 1265 kg/ha. Resistant to downy mildew. 2. Recommended for notification to entire country.
10.	Linseed	Mau Azad Als-2 (LMS – 149-4)	1. Recommended for release and cultivation in the States of Chhattisgarh, Maharashtra, Karnataka and Orissa in timely sown under rainfed condition. Average yield under normal condition is 8.15 q/ha. Resistant to rust. 2. Recommended for notification to entire country.
11.	Ground nut	Divya (CSMG-2003-19)	1. Recommended for release and cultivation in the States of Uttar Pradesh and Rajasthan under timely sown and irrigated condition in Kharif season. Average yield under normal condition is 3000 kg/ha. 2. Recommended for notification to entire country.
12.	Mesta	AMV-7 (AHS	1. Recommended for release and cultivation in the

		160)	States of all Mesta growing areas of the country under rainfed condition. Average yield under normal condition is 25 to 30 q/ha. 2. Recommended for notification to entire country.
13.	Forage Bajra	NDFB-3(Narendra Chara Bajra-3)	1. Recommended for release and cultivation in the State of Eastern Uttar Pradesh, Bihar, Orissa, Jharkhand and West Bengal in normal and salt affected soil in Kharif and zaid season. Average yield under normal condition is 483 q/ha (GFY) and average yield under salt affected soil is 303 q/ha (GFY). 2. Recommended for notification to entire country.

Table – 3

Following varieties have been recommended for release/notification (Central varieties), subject to certain conditions as stated against each:-

S. No.	Crop	Name of the variety	Remarks
1	Maize	SMH-3904	1. Recommended for release and cultivation in the States of Bihar, Eastern Uttar Pradesh, Jharkhand, Orissa, Andhra Pradesh, Karnataka, Tamil Nadu and Maharashtra in Kharif season. Average yield under normal condition is 6403 kg/ha. Moderately resistant to TLB and ESR. 2. Recommended for notification to entire country subject to submission of the seed samples of parental lines to NBPGR, for accession.
2.	Fieldpea	HFP 529	1. Recommended for release and cultivation in North West Plain Zone under irrigated condition. Average yield under normal condition is 2620 kg/ha. 2. Recommended for notification to entire country subject to indicating the name of the States of the Zone.
3.	Sugarcane	Karan 8 (Co 0237)	1. Recommended for release and cultivation in the States of Punjab, Haryana, Rajasthan, Uttarakhand, Western and Central Uttar Pradesh. Average yield under normal condition is 71.33 ton/ha. 2. Recommended for notification to entire country subject to submission of the sample to NBPGR, New Delhi for accession.
4.	Sugarcane	Samriddhi	1. Recommended for release and cultivation in

		(Co 0403)	Peninsular zone of India. Average yield under normal condition is 101.5 ton/ha. Resistant to redrot. 2. Recommended for notification to entire country subject to submission of the sample to NBPGR, New Delhi for accession and subject to indicating the name of the States of the Zone.
5.	Sugarcane	IMARTI (CoSe0142)	1. Recommended for release and cultivation in the States of Uttar Pradesh, Bihar, West Bengal under normal sown condition. Average yield under normal condition is 65.87 ton/ha. 2. Recommended for notification to entire country subject to submission of the sample to NBPGR, New Delhi for accession.
6.	Jute	Shresthaa (KJC-7)	1. Recommended for release and cultivation in the States of Orissa, Assam and Uttar Pradesh. Average yield under normal condition is 28.14 q/ha (fiber yield). 2. Recommended for notification to entire country subject to submission of the sample to NBPGR, New Delhi for accession.
7.	Tossa Jute	JRO 2407 (Samapti)	1. Recommended for release and cultivation for entire tossa jute growing belt over all the jute growing states of the country, for early March sowing on medium to high land of high humid areas having alternate rain and sunshine. Average yield under normal condition is 35 to 40 q/ha. Resistant to root rot & stem rot. 2. Recommended for notification to entire country subject to submission of the sample to NBPGR, New Delhi for accession.

Table – 4

Following variety have been recommended for area extension.

S. No.	Crop	Name of the variety	Remarks
1.	Pearl Millet	Proagro-9444	The Committee noted that this cultivar has been notified vide SO No.122 (E) dated 2.2.2005. Now recommended for area extension to the States of Rajasthan, Gujarat, Haryana, Uttar Pradesh, Madhya Pradesh, Delhi and Punjab in Kharif season.

Table – 5

Following is recommended for renaming the variety.

S. No.	Crop	Name of the variety	Remarks
1.	Rice	CSR 30 (88-H5-1-1-2) (IET 14720)	Deferred. It is proposed that the issue may be re-examined with strict reference to definition and characteristics of Basmati rice in the forth coming meeting.

Table – 6

Following varieties have been deferred/rejected for the reason stated against each.

S. No.	Crop	Name of the variety	Remarks
1.	Rice (Hybrid)	US 382 (IET20727)	Deferred for want of comments from project coordinator (Rice) regarding performance and identification details.
2	Rice (Hybrid)	DRH 775(IET 19741)	The cultivar under reference has already been notified vide S.O. No. 2187(E) dated 27 th August, 2009 and recommended for cultivation in the state of Chhattisgarh, Jharkhand and West Bengal under irrigated conditions. Now, the sponsoring authority approached the Committee for area extension which has been rejected as it is not showing any superiority over the check for the purpose.
3.	Mesta	JRR1 (Swapan) (JR-07)	The Committee rejected the proposal due to inconsistent yield.
4.	Mesta	JRM-2 (Gour) (JMB-75)	The Committee rejected the proposal due to inconsistent yield.

Item No. 4: Proposals received for consideration of notification (State varieties) in 60th Meeting of Central Sub-Committee on Crop Standards, Notification and Release of Varieties for Agricultural crops.

The following proposals for notification (State Varieties) are received for consideration in the 60th meeting of the Sub-Committee:

Table No. 7

Following varieties have been recommended for notification (State varieties).

S. No.	Crop	Variety	Sponsoring State
1.	Wheat	MP (JW) 1201 (MP 1201)	Madhya Pradesh
2.	Forage Sorghum	Pant Chari 7 (UTFS 46)	Uttarakhand/2010
3.	Forage Sorghum	Pant Chari-8 (UTMC 535)	Uttarakhand/ 2010
4.	Finger millet	DHRS 1	Karnataka/2010
5.	Finger Millet	PRM-2	Uttarakhand/2010
6.	Finger Millet	KMR-301 (Gowri)	Karnataka/2009
7.	Rice	Chandrama(CR-386-2-10)(IET 9354, 10419)	Assam/2007
8.	Field pea	IPF 4-9	Uttar Pradesh /2010
9.	Field Pea	VL Matar 47 (VL 47)	Uttarakhand/ 2010
10.	Horse gram	Indira Kulthi-1 (IKGH-05-01)	Chhattisgarh/2010
11.	Pigeon pea	TS-3R	Karnataka/2010
12.	Lentil	VL Masoor 514 (VL 514)	Uttarakhand/2010
13.	Lentil	VL Masoor 133 (VL 133)	Uttarakhand/2010
14.	Linseed	Jawahar Linseed-41 (PKDL-41)	Madhya Pradesh/2010

Table No. 8

Following varieties have been recommended for notification, subject to certain conditions as stated against each:-

S. No.	Crop	Variety	Sponsoring State	Remarks
1.	Maize	HEMA (NAH-1137)	Karnataka/2010	Recommended for notification subject to submission of the sample to NBPGR for accession.
2.	Kodo	Jawahar Kodo – 98	Madhya	Recommended for notification to subject to submission of the

	Millet	(RK-98)	Pradesh	sample to NBPGR for accession.
3.	Oat	Jawahar Oat-2 (JO 2000-61)	Madhya Pradesh	Recommended for notification to subject to submission of the sample to NBPGR for accession
4.	Chickpea	JG-12 (JG 2001-12)	Madhya Pradesh/ 2010	Recommended for notification to subject to submission of the sample to NBPGR for accession
5.	Soybean	Pant Soybean 19 (PS 1368)	Uttarakhand/ 2010	Recommended for notification to subject to submission of the sample to NBPGR for accession

Table No. 9

Following varieties have been deferred/rejected for the reasons stated against each

S. No.	Crop	Variety	Sponsoring State	Remarks
1.	Rice	Malaviya Sugandhit Dhan - 46005 (HUR 46005)	Uttar Pradesh	Deferred for want of All India Coordinated Trial Data on diseases & Pest and NBPGR Certificate for submitting the Seed Sample.
2.	Rice	CSAR 839-3 (Azad Basmati)	Uttar Pradesh	Deferred for want of All India Coordinated Trial Data on diseases & Pest, NBT trial data and NBPGR Certificate for submitting the Seed Sample.
3.	Rice	Mugad Siri-1253	Karnataka/2010	Deferred for want of All India Coordinated Trial Data on diseases & Pest and NBPGR Certificate for submitting the Seed Sample.
4.	Rice	VL Dhan 87 (VL 30424)	Uttarakhand	Deferred for want of All India Coordinated Trial Data on

				diseases & Pest.
5.	Rice	Malaviya Dhan 5-1(HUR 5-1)	Uttar Pradesh	Deferred for want of All India Coordinated Trial Data on diseases & Pest.
6.	Rice	Raksha	Karnataka/2010	Deferred for want of All India Coordinated Trial Data on diseases & Pest.
7.	Wheat	KO424 (Golden Halna)	Uttar Pradesh	Rejected due to susceptible to stem and brown rust.
8.	Wheat	MP 3269 (JW 3288) Usha	Madhya Pradesh	Rejected due to highly susceptible to stem and leaf rust.
9.	Durum Wheat	Pusa Gaurav(HI 8691)	Madhya Pradesh	Rejected due to highly susceptible to leaf rust.
10.	Durum Wheat	Malav Kranti(HI 8638)	Madhya Pradesh	Rejected due to highly susceptible to stem rust.
11.	Barley	PRB 701	Uttarakhand/2010	Deferred for want of All India Coordinated Trial Data on diseases & Pest.
12.	Maize	Vivek Maize Hybrid-27 (FH 3288)	Uttarakhand/2007	Deferred for want of All India Coordinated Trial Data on diseases & Pest.
13.	Sorghum	Wani 11/6 (PKV Ashwini)	Maharashtra/2006	Deferred for want of All India Coordinated Trial Data on diseases & Pest.
14.	Finger Millet	GPU 66	Karnataka/2009	Deferred for want of All India Coordinated Trial Data on diseases & Pest.
15.	Cowpea	Pant Lobia-2(PGCP-4)	Uttarakhand/2010	Deferred for want of All India Coordinated Trial Data on diseases & Pest and NBPGR Certificate for submitting the Seed Sample.
16.	Urdbean	Indira Pratham Urd	Chhattisgarh/2010	Deferred for want of All India Coordinated Trial Data on diseases & Pest.
17.	Sunflower	Bhanu	Maharashtra/2010	Rejected due to highly susceptible to diseases .
18.	Sunflower	RSFH-130	Karnataka/2009	Deferred for want of All India Coordinated Trial Data on

		(Bhadra)		diseases & Pest and NBPGR Certificate for submitting the Seed Sample.
19.	Sunflower	RSFV-901 (Kanthi)	Karnataka/2010	Deferred for want of All India Coordinated Trial Data on diseases & Pest and NBPGR Certificate for submitting the Seed Sample.
20.	Safflower	SSF-658	Maharashtra/2009	Rejected due to highly susceptible to diseases.
21.	Toria	Indira Toria-1 (TCN-06-9)	Chhattisgarh/2010	Deferred for want of All India Coordinated Trial Data on diseases & Pest.
22.	Linseed	JLS-66 (SLS 66)	Madhya Pradesh	Deferred for want of disease data for check variety for comparison.
23.	Sesame	DSS-9	Karnataka/2010	Deferred for want of All India Coordinated Trial Data on diseases & Pest.
24.	Sesame	Gujarat Til-4 (GTil-4) (AT-159)	Gujarat/2010	Deferred for want of All India Coordinated Trial Data on diseases & Pest.
25.	Ground nut	Gujarat Junagadh Groundnut 31 (GJG-31) (J-71)	Gujarat/2010	Deferred for want of All India Coordinated Trial Data on diseases & Pest.
26.	Ground nut	Gujarat Junagadh Groundnut-9 (GJG-9)(J 69)	Gujarat/2010	Deferred for want of All India Coordinated Trial Data on diseases & Pest.
27.	Ground nut	Chintamani-2 (KCG-2)	Karnataka/2010	Deferred for want of All India Coordinated Trial Data on diseases & Pest and NBPGR Certificate for submitting the Seed Sample.

Item No. 5: Proposal to revise the proforma meant for release/notification and notification of the varieties.

The committee decided to revise the proforma meant for release/notification and Notification to accommodate the information pertains to DNA Finger printing particulars under the chairmanship of ADG (Seeds) ICAR. Committee also authorized ADG (Seeds) to choose the members for the purpose and to submit the revised proforma within a month period to chairman for taking necessary action. It was also desired while revising the proforma the committee members should go each and every particulars related to present varietal development scenario to be incorporated in the proforma.

Item No. 6: Proposal to review variety of wheat HD2967 submitted by IARI New Delhi for release/notification.

The Committee noted that the proposal under reference has been discussed by the subcommittee in its 54th, 56th, 57th & 58th meetings and no final decision for release/notification as Pusa Borlaug (HD 2967). Committee further noted that a special meeting was convened under the chairmanship of the Secretary (A&C) on 29th March 2011, on the request of sponsoring authority to reconsider this proposal. In the meeting it was decided that the matter be placed before the Central Sub-Committee on Crop Standards, Notification and Release of Varieties for Agricultural Crops for review along with updated data if any, pertaining to the variety HD-2967 in addition to yield data and data on evidence of resistance to pest and diseases etc. which was available in 2009 for 3 years. Further the Sub- Committee may examine whether earlier 3 years data relating to the variety was interpreted appropriately.

In response to the decision, the sponsoring authority submitted the following information.

“The yield performance was compared after 3 and 4 year, the new variety HD 2967 showed slightly higher yield than the checks.

Disease Reaction:

The HD 2967 was scored as 40S with ACI 11.2 as compared to 10S with ACI 3.0 of DBW 17 for stripe rust in 2006-07 and showed susceptibility to reaction to some of the races of brown and yellow rust, thus considered susceptible to diseases as per the original proposal.

However, as per the new proposal of 4 year testing showed that the check variety DBW 17 scored as 40S and ACI 10.0 which was earlier showing resistant reaction (Table 3A, Page 26, New Proposal) has showed similar reaction as the new variety HD 2967. Further, the comparative reaction to pathotypes to rusts is given below:

(1) Pathotypes of Stripe Rust (2008-2010)

Growth Stage	Year	Pathotype			
		78 S 84		46 S 119	
		HD2967	BW 343	HD2967	PBW 343
Seedling Stage SRT	08-09	R	S	MR	MR
	09-10	R	S	MR	MR
Adult Stage APR (Ludhiana and Delhi)	09-10	0	40S	0	0

HD 2967 showed resistant reaction both in seedling and adult stage while check variety PBW 343 is susceptible against the predominated races of the region.

(2) Pathotypes of Brown Rust (2009-2010)

Growth Stage	Year	Pathotype					
		77-2		77-5		104-2	
		HD2967	BW 343	HD2967	PBW 343	HD2967	PBW 343
Seedling Stage SRT	09-10	S	R	R	S	R	S
Adult Stage APR	09-10	-	-	TR	10 MR	0	5R

HD 2967 showed resistant reaction against the predominant pathotypes 77-5 and 104-2 while check variety PBW 343 was resistant to 77-2 pathotype. It is concluded that new variety HD 2967 is at par in yield and disease reaction with DBW 17 and significantly superior than PBW 343 while taking into consideration revised proposal. In the crop season rabi 2010-11, there was epidemic of rust and all the varieties such as PBW 343, DBW 17 and PBW 550

recommended for NWPZ were susceptible. Thus, the variety HD 2967 which possesses different combination of genes for resistance against predominant pathotypes viz. 78 S 84 of yellow rust and 77-5 and 104-2 of brown rust and yield stability than recommended checks PBW 343, DBW 17 and PBW 550 of NWPZ.” considering the explanation provided by the sponsoring authority, the committee recommended the variety HD-2967 for release/ notification.

Chairman, Central Seed Committee reviewed the issue with AS (GCP), DDG(CS), ICAR and JS(Seeds) on 08.09.2011. It was noted from the data furnished by ICAR from 2006-07 to 2010-11 on the disease reaction of HD-2967 to yellow rust, that in the year 2010-11, HD-2967 has a highest score (HS) of 10 on the susceptibility scale which is $1/8^{\text{th}}$ of the PBW-343 and DBW-17, and $1/6^{\text{th}}$ of PBW-550. In respect of brown rust, for the same year i.e. 2010-11, HD-2967 has a highest score (HS) of 5 on the susceptibility scale which is $1/12^{\text{th}}$ of PBW-343 but equal to PBW-550. However, DBW-17 is moderately susceptible during 2010-11 and hence, on comparative basis, HD-2967 fares lower in disease reaction to brown rust viz-a-viz. DBW-17. From 2006-07 to 2010-11, disease reaction of HD-2967 and other varieties to yellow rust and brown rust has shown variation from moderately resistant to moderately susceptible to susceptible but the variation are totally inconsistent and do not display any particular pattern across the years for any co-relation against a common denominator. These variations are attributable to environmental conditions, existing at that particular time, which directly impacts the onset and intensity of rust disease and since these conditions never follow a fixed pattern, but varies significantly from year to year, the co-relation of data across the years on a common denominator is difficult. It was informed that, in the North West Plain Zone, it is yellow rust which is predominant and HD-2967's performance against yellow rust as per above data is comparatively better than other varieties. HD-2967 has also shown presence of minor genes in addition to major genes and due to this genetic variability it tends to have an enhanced resistance to yellow rust.

In the light of the above and based on the available data of ICAR along with their comments and also in view of the recommendations of Central sub- Committee on Crop Standards, Notification and Release of Varieties for Agriculture Crops, Chairman Central Seed Committee approved the recommendations for release/notification of the variety HD 2967 for the North West Plain Zone (NWPZ) i.e Punjab, Haryana, Rajasthan, Delhi, Western Uttar Pradesh (except Jhansi Division), Jammu & Kathua region of J & K, Una district and Paonta Valley areas of HP, Tarai region of Uttarakhand.

Meeting ended with a vote of thanks to the Chairs.
