

Minutes of the 61st Meeting of Central Sub-Committee on Crop Standards, Notification and Release of Varieties for Agricultural Crops held under the Chairmanship of Prof. S.K. Datta, Deputy Director General (Crop Sciences), ICAR on 15th October, 2011 at Karnataka State Seed Corporation, Bangalore.

The Chairman, Central Sub-Committee on Crop Standards, Notification and Release of Varieties for Agricultural Crops welcomed members of the Sub-Committee and special invitees. The list of the participants who attended the meeting is annexed as Annexure-I.

Member-Secretary of the Sub-Committee provided the account of the earlier Sub-Committee and its follow-up action and the issues to be discussed by this Sub-Committee. After introduction, regular agenda items were taken-up for discussion as under:-

Item No.1: Confirmation of the minutes of 60th meeting of Central Sub-Committee on Crop Standards, Notification and Release of Varieties for Agricultural Crops held on 28th June, 2011 at NBPGR, New Delhi.

The minutes of 60th meeting of Central Sub-Committee on Crop Standards, Notification and Release of Varieties for Agricultural Crops has been circulated vide letter No. 3-10/2010-SD.IV dated 23rd September, 2011. No comments have been received on the minutes of the meeting; therefore, the minutes of the meeting were confirmed. The Sub-Committee noted that the Gazette Notification for the varieties recommended for notification has been issued vide S.O. No. 2326(E) dated 10th October, 2011.

Item No.2: Review of follow up action of the 60th meeting of Central Sub-Committee on Crop Standards, Notification and Release of Varieties for Agricultural Crops.

The Sub-Committee also approved the notification of the following varieties recommended by the 55th and 58th meeting, which have been kept in abeyance for want of submission of seed sample with NBPGR, detailed Morphological characters, All India Coordinated Trial data on disease, genesis of the parentages etc to the Sub-Committees, for which required information has been received:-

Table-1

S. No	Kind	Variety
1.	Bread Wheat	AKAW-4627
2.	Wheat	KRL-210
3.	Maize	Vivek Maize Hybrid 43 (FH 3358)
4.	Maize	Vivek Maize Hybrid 39(FH 3356)

Maize variety KMH-25K60 and Kaveri 50 (KMH 50), Pearl Millet variety Kaveri Super Boss (MH 1553) had been recommended by 58th meeting of the Sub-Committee for release/notification, subject to submission of information about the seed production methodology, mode of the development, parentage details and its genesis. Accordingly, the sponsoring authority provided the required information. After in-depth discussion in the meeting; it was decided to maintain the status quo as the information provided by the Sponsoring Authority with regards to parentage and other particulars are insufficient and inadequate to take decision.

Item No.3: Release/Notification Proposals received for consideration in the 61st Meeting of Central Sub-Committee on Crop Standards, Notification and Release of Varieties for Agricultural Crops.

The following proposals have been received for discussion and consideration in the 61st meeting of the Sub-Committee for release/notification (Central varieties) and the decision of the committee are given as under:-

Table – 2

After the in-depth discussion, the varieties listed below have been recommended for release/notification (Central varieties).

S. No.	Crop	Name of the variety	Remarks
1.	Wheat	HD 3043	1. Recommended for release and cultivation in the States of Punjab, Haryana, Delhi, Rajasthan (Except Kota and Udaipur Divisions), Western UP (Except Jhansi Division), Parts of J&K (Kathua district), parts of HP (Una district & Paonta Valley and Uttarakhand (Tarai region) under restricted irrigated conditions. Average yield under normal condition is 42.8 quintal/ ha. Resistant to stripe rust and leaf rust diseases. Medium to late maturity group (134 to 158 days). 2. Recommended for notification to entire country.
2.	Maize	P3501 (X7B401)	1. Recommended for release and cultivation in the States of Uttar Pradesh, Bihar, Odisha, Jharkhand, Madhya Pradesh, Rajasthan & Gujarat under Kharif season. Average yield under normal condition is 65 to 75 quintal/ ha. Moderately resistance to Maydis Leaf Blight, RDM, BSDM, PFSR, and P. Rust diseases. Full maturity group (100 to 105 days).

			2. Recommended for notification to entire country.
3.	Pearl Millet (Hybrid)	Shine (VBBH 3040), (MH 1578)	1. Recommended for release and cultivation in the States of Maharashtra, Karnataka, Andhra Pradesh and Tamil Nadu under rainfed Kharif season. Average yield under normal condition is 32.75 quintal/ ha. Highly resistant to downy mildew and smut. Resistant to ergot, rust and blast diseases. Medium maturity group (80 to 83 days). 2. Recommended for notification to entire country.
4.	Blackgram	VBN (Bg) 7 (VBG04-008)	1. Recommended for release and cultivation in the States of Tamil Nadu, Andhra Pradesh, Karnataka and Orissa in kharif season. Average yield under normal condition is 7.9 quintal/ ha. Resistance to MYMV, PMD, LCV and Root rot diseases. Early maturity group (63 to 90 days). 2. Recommended for notification to entire country.
5.	Ground nut	ICGV 00350	1. Recommended for release and cultivation in the States of Tamil Nadu and Andhra Pradesh under Rabi-summer irrigated condition as well as rainfed condition in Kharif season. Suitable for all soil types except heavy soils. Average yield under normal condition is 19.5 to 29.75 quintal/ ha. Resistance to late leaf spot and rust, tolerant to stem rot diseases. Medium maturity group (114 days). 2. Recommended for notification to entire country.
6.	Ground nut	HNG-123 (HNG-123)	1. Recommended for release and cultivation in the states of Rajasthan, Uttar Pradesh and Punjab under Kharif rainfed and suitable in timely sown conditions. Average yield under normal condition is 26.48 quintal/ ha. Tolerant to collar rot, stem rot, early leaf spot diseases, <i>Spodoptera litura</i> and leaf miner. Medium maturity group (124 days).

			2. Recommended for notification to entire country.
7.	Ground nut	Raj Mungfali-1 (RG-510)	1. Recommended for release and cultivation in the States of Rajasthan and Punjab under Kharif rainfed conditions. Average yield under normal condition is 25.58 quintal/ ha. Tolerant to collar rot, stem rot, early leaf spot, rust, peanut stem necrosis diseases, thrips, jassids and grass hopper. Medium maturity group (112 to 138 days). 2. Recommended for notification to entire country.
8.	Indian Mustard	Pusa Mustard 28 (NPJ-124)	1. Recommended for release and cultivation in the States of Jammu Kashmir (Plains), Punjab, Haryana, Rajasthan, Delhi and Western Uttar Pradesh. Suitable for early sown irrigated conditions in Rabi Season. Average yield under normal condition is 19.93 quintal/ ha. Tolerant to stem rot, white rust and powdery mildew. Early maturity group (97 to 131 days). 2. Recommended for notification to entire country.
9.	Sugarcane	Haryana Ganna 128 (CoH 128)	1. Recommended for release and cultivation in the States of Haryana, Punjab, Rajasthan, Uttaranchal, Western and Central Uttar Pradesh. Average yield under normal condition is 76.23 tones/ha. Moderately resistant to wilt disease. Medium to late maturity group. 2. Recommended for notification to entire country.
10.	Barley	DWRUB64	1. Recommended for release and cultivation in the States of Punjab, Haryana, Western UP, Delhi and Rajasthan (except Kota and Udaipur divisions) under irrigated late sown condition. Average yield under normal condition is 40.5 quintal/ha. Highly resistant to yellow rust and tolerant to leaf blight. Early maturity group (116 to 117 days). 2. Recommended for notification to entire country.

Table – 3

After the in-depth discussion, following varieties have been recommended for release/notification (Central varieties), subject to certain conditions as stated against each:-

S. No.	Crop	Name of the variety	Remarks
1	Rice (Hybrid)	VNR 2245 (IET 20716) (VNR-204)	1. Recommended for release and cultivation in the States of Chhattisgarh and Tamil Nadu under irrigated condition. Average yield under normal condition is 70.23 quintal/ha. Resistant to blast, neck blast and moderately resistant to RTV, Sheath rot, brown spot diseases, leaf folder, GLF and whorl maggot. 2. Recommended for notification to entire country, subject to submission of information about the genesis of Male parental line.
2.	Rice (Hybrid)	VNR 2355 Plus (IET 20735) (VNR-202)	1. Recommended for release and cultivation in the states of Uttar Pradesh, Uttarakhand, West Bengal, Maharashtra and Tamil Nadu under irrigated condition. Average yield under normal condition is 59.56 quintal/ha. Resistant to blast, neck blast, Sheath rot and brown spot diseases. Moderately resistant to leaf folder, GLF and whorl maggot. 2. Recommended for notification to entire country subject to submission of information about the genesis of Male parental line.
3.	Maize (Hybrid)	SMH-3904 (SMH 3904)	1. Recommended for release and cultivation in the States of Bihar, Eastern Uttar Pradesh, Jharkhand, Orissa, Andhra Pradesh, Karnataka, Tamil Nadu and Maharashtra under Kharif season. Average yield under normal condition is 64 to 91 quintal/ha. Moderately resistant to TLB and SR. Tolerant to MLB and BSLB. Late maturity group (95 to 102 days). 2. Recommended for notification to entire country subject to submission of the seed sample of parental lines to NBPGR, New Delhi for accession
4.	Castor	DSP 222 (DSP 222)	1. Recommended for release and cultivation in the states of Gujarat, Rajasthan, Uttar Pradesh and Haryana under irrigated conditions. Average yield under normal condition is 26 quintal/ha. Resistant to Wilt disease and tolerant to leaf hoppers. Late maturity group (123 to 148 days).

			2. Recommended for notification to entire country subject to submission of information about the seed production methodology, mode of the development particulars of parents, registration particulars with Ministry of Science and Technology authorizing them to conduct the research and development in the field of crop development.
5.	Forage Pearl Millet	IGPM 5-2	1. Recommended for release and cultivation in the Hills of North West, Central & North East zone of the country under rainfed condition. Average yield under normal condition is 420.5 quintal/ha (Green Fodder). Moderately resistant to leaf spot, downy mildew, stem borer and <i>Pratylenchus zeae</i>. Late maturity group (125 to 130 days). 2. Recommended for notification to entire country subject to indicating the name of the States of the Zone.

Table – 4

The varieties stated below have been deferred/rejected after in-depth discussion for the reasons stated against each.

S. No.	Crop	Name of the variety	Remarks
1.	Rice	Vallabh Basmati--24 (IET 20827) (MAUB-171)	The cultivar under reference has been deferred for want of details regarding primary, secondary and other characteristics of basmati so as to compare Basmati standards prescribed by the Government of India to consider as Basmati. Sponsoring authority has been further directed to indicate the name of the States of the Zone and to re-submit the proposal.
2	Maize	KMH-3712	Deferred for want of one more year trial data.
3.	Chickpea	Vallabh Kabuli Channa-1 (WCGK-2000-16)	The cultivar under reference has been deferred for want of proposal to be submitted in a prescribed proforma and presenting data in a seriatim.
4.	Urd	Vallabh Urd-1	The cultivar under reference has been deferred for want of proposal to be submitted in a prescribed proforma.
5.	Urdbean	Azad Urd-4 (KU 99-21)	The cultivar under reference has been deferred for want of latest trial data for one more year along with certificate from NBPGR for submission of seed sample for accession and the name of the state for which it was identified for cultivation.

6.	Sunflower	BSFH-007 (James 007)	The cultivar under reference has been rejected as it is not showing any superiority in seed yield, oil yield and duration over the check.
----	-----------	-------------------------	---

Item No. 4: Proposals received for discussion and consideration of varieties for notification (State varieties) in the 61st Meeting of Central Sub-Committee on Crop Standards, Notification and Release of Varieties for Agricultural crops.

The following proposals have been received from the states for consideration and notifications (state varieties) in the 61st meeting of the Sub-Committee:

Table No. 5

After the in-depth discussion, the varieties listed below have been recommended for notification (State varieties).

S. No.	Crop	Variety	Sponsoring State
1.	Rice	IGRKVR-1244 (R1244-1246-1-605-1) (IET 19796)	Chhattisgarh/2010
2.	Rice	Indira Barani Dhan-1 (RF-17-38-70) (IET 21205)	Chhattisgarh/2010
3.	Soybean	SL 744	Punjab/2010
4.	Wheat	Raj Vijay Wheat 4106 (MP 4106)	Madhya Pradesh/2010
5.	Chick pea	Raj Vijay Kabuli gram 101 (JSC 42)	Madhya Pradesh/2010
6.	Chick pea	Raj Vijay gram 201 (JSC 40)	Madhya Pradesh/2010
7.	Lentil	LL 931	Punjab/2009

Table No. 6

Following varieties have been recommended for notification (State varieties), subject to certain conditions as stated against each:-

S. No.	Crop	Variety	Sponsoring State	Remarks
1.	Barley	PL 807 (PL 807)	Punjab/2009	Recommended for notification subject to submission of the seed sample to NBPGR for accession.
2.	Sorghum	GJ-42 (SR-666-1)	Gujarat/2008	Recommended for notification subject to submission of the seed sample to NBPGR for accession.

Table No. 7

State varieties listed below have been deferred/rejected and not considered for notification for the reasons stated against each

S. No.	Crop	Variety	Sponsoring State	Remarks
1.	Rice	Punjab Mehak-1	Punjab/2009	The cultivar under reference is susceptible to blast disease. Hence, it has been rejected.
2.	Maize	Bajaura Sweet Corn	Himachal Pradesh/2009	Deferred, Sponsoring authority has been directed to route the proposal through State Seed sub-committee along with relevant data required for consideration.
3.	Maize	Bajaura Pop Corn	Himachal Pradesh/2009	Deferred, Sponsoring authority has been directed to route the proposal through State Seed sub-committee along with relevant data required for consideration.
4.	Maize	Punjab Sweet Corn-1 (JC (sw)1)	Punjab/2008	Deferred for want of All India Coordinated Trial data on diseases & Pest, and a certificate issued by NBPGR for submitting the Seed Sample.

5.	Chickpea	Indira Chana-1	Chhattisgarh/2010	Deferred for want of All India Coordinated Trial Data on diseases & Pest and detailed morphological characters.
6.	Pigeon pea	PKV TARA (TAT-9629)	Maharashtra/2009	The cultivar under reference has been rejected due to susceptible to diseases.
7.	Mung bean	SML-832	Punjab/2010	Deferred for want of All India Coordinated Trial Data on diseases & Pest.
8.	Ground nut	ICGV 93468 (AVTAR)	Uttar Pradesh/2008	Deferred for want of All India Coordinated Trial Data on diseases & Pest and detailed morphological characters.
9.	Cotton	Anand Desi Cotton-1	Gujarat/2010	Deferred for want of All India Coordinated Trial Data on diseases & Pest and detailed morphological characters.
10.	Cotton	GN.Cot. 25	Gujarat/2010	Deferred for want of All India Coordinated Trial Data on diseases & Pest.
11.	Rice	GNR-2	Gujarat/2010	Deferred for want of All India Coordinated Trial Data on diseases & Pest.
12.	Pigeon pea (Hybrid)	ICPH 2671	Madhya Pradesh/2010	Deferred for want of All India Coordinated Trial Data on diseases & Pest and a certificate from NBPGR for submitting the Seed Sample with them.
13.	Pigeon pea	RVA 28 (JSA 28)	Madhya Pradesh/2010	Deferred for want of All India Coordinated Trial Data on diseases & Pest and detailed morphological characters.
14.	Chick pea	Raj Vijay serve Jeet 102 Kabuli gram 101 (JSC 43)	Madhya Pradesh/2010	Deferred for want of All India Coordinated Trial Data on diseases & Pest.

15.	Lentil	Raj Vijay Lentil 31 (JL 31)	Madhya Pradesh/2010	Deferred for want of All India Coordinated Trial Data on diseases & Pest.
16.	Safflower	Raj Vijay Safflower 113 (JSI-113)	Madhya Pradesh/2010	Deferred for want of All India Coordinated Trial Data on diseases & Pest.
17.	Soybean	Raj Vijay Soybean 2001- 4	Madhya Pradesh/2010	Deferred for want of All India Coordinated Trial Data on diseases & Pest and detailed morphological characters.

Item No. 5: Renaming of paddy cultivar CSR 30 (88-H5-1-1-2) (IET 14720) notified vide SO No. 1134(E) dated 15.11.2001 as Basmati CSR30.

The issue under reference has been discussed in the meeting. The committee noted that the paddy cultivar CSR30 has been notified vide SO No. 1134(E) dated 15.11.2001. The proposal in question has already been discussed in the 60th meeting of the Central Sub-Committee on Crop Standard Notification and Release of Variety on Agricultural Crops for renaming the variety as Basmati. Accordingly, it was recommended to rename the variety. This recommendation was put up to Chairman, Central seed committee for his approval. The competent authority has sought clarification whether the data generated by the sponsoring authority under the National Basmati Trials were on sodic soil or on normal soil and what has been its performance including expression of the Basmati characters in the light of the fact that CSR30 was first recommended for release and cultivation for the areas of North Western states of UP, Haryana and Punjab for sodic soil ($pH_2 = 8.8-9.5$) and notified in the year 2001 as an ordinary rice. Hence, this vital information along with the relevant position in respect of Geographical Indication for declaring this variety as Basmati needs to be confirmed. While declaring the variety under reference as Basmati it needs to be checked whether it would amount to dilution of India's position vis-à-vis other Basmati producers.

Meeting ended with a vote of thanks to the Chair.
